

PEAR PUREE

Aseptic - All Natural - No Sugar Added

Our Pear Purée brings naturally delicate sweetness, a smooth texture, and a fresh, mellow fruit flavor to beverages, desserts, sauces, and culinary creations. Made with real pears and no added sugar, it's a versatile clean-label ingredient that adds subtle fruit character without overpowering other flavors.

Technical Specifications:

Ingredients:

Pear purée, filtered water

Allergens: None

Color: Pale Yellow

Flavor: Full-flavored pear

Brix: 14–16

pH: 3.0–4.5

Pack: 40 lb. bag-in-box
400 lb. box (upon request)

Shelf Life: 1 Year

After opening, keep refrigerated and use within 10 days

Metal Detection: Hourly during production, our metal detector is calibrated for adequate sensitivity to and is set to reject the following test pieces: Ferrous 2.0 mm, Non-Ferrous 2.8 mm, Stainless Steel 3.5 mm

Pairings

Pear has a way of bringing out the best in other flavors without stealing the spotlight.

Apple, peach, ginger, lemon, vanilla, cinnamon, honey, cardamom, raspberry, and elderflower.

Its delicate sweetness and mellow fruit character can take a recipe in so many directions — crisp and refreshing, warm and spiced, light and floral, or rich and dessert-inspired.

That subtle versatility makes pear a natural choice for craft beverages, ciders, smoothies, frozen desserts, and creative seasonal products.

Suggested Dosing

For beer, cider, seltzer, and fermented beverage applications, start with 0.5–1 lb of pear purée per finished gallon. Use the lower end for a subtle, refreshing pear note or increase the amount for a fuller fruit flavor, delicate sweetness, and a smooth, mellow finish.

Because pear has a naturally delicate flavor that can be overshadowed by stronger ingredients, we recommend small-batch testing to fine-tune fruit intensity, sweetness, acidity, and overall balance. For fermented beverages, keep in mind that pear's natural sugars can ferment, changing the final sweetness and flavor profile.
